## TWENTY FOUR

The Pilot 24, a vessel that embodies quality. Holby Marine Company has been building boats for more than 20 years continuing a deep tradition of boat building in Bristol, Rhode Island. Bristol is a place synonymous with boat building. For centuries some of the best vessels to sail the water have been built in Bristol, and we are proud to continue this tradition. The Pilot 24 was designed by award winning designer Mark Ellis. Mark has created a hull that maintains its classic good looks yet performs with the best of today's modern vessels. The Pilot 24 incorporates a modified v-hull with wide chines that make it remarkably stable, quick to plane, and a remarkably smooth ride. The Pilot 24 is then built using the best materials and hardware that the industry has to offer. The hull is constructed with hand laid fiberglass that is then resin infused. This process provides a strong and durable hull that is unmatched in the industry. The Pilot 24 displays classic good looks and traditional style, and blends them with the best of modern technology, creating a unique vessel you can be proud to own for many years. Holby Marine Company is devoted to providing quality and the Pilot 24 is a true example of this commitment.

The Pilot 24 offers a spacious cockpit with ample seating. Plenty of storage can be found in the deck and seats. The port seat offers a freshwater sink and single burner stove, and the starboard side offers an ice chest.

The Pilot 24 interior offers plenty of space for a weekend stay. With an hidden head located to the starboard side and a freshwater sink and storage located to the port, you have the essential needs for a comfortable weekend getaway.
